

CLAIM AMENDMENTS

This listing of claims will replace all prior versions and listings of claims in the application:

1. – 35. (Canceled).

36. (Currently Amended) A telecommunications subscriber service package, comprising:
a non-transitory computer-readable storage medium to:

store an allocation of unshared account units for use of a first subscriber service;

store an allocation of shared account units for use of a second subscriber service and
available for use of the first subscriber service;

store instructions that, when executed by a processor, cause the processor to determine a
number of unshared account units remaining; ~~and~~

store instructions that, when executed by the processor, cause the processor to determine
a type of account units to be utilized by the first subscriber service based on the
number of unshared account units remaining, wherein the allocation of unshared
account units is utilized by the first subscriber service prior to utilization of the
allocation of the shared account units by the first subscriber service; and

store instructions that, when executed by the processor, cause the processor to allocate
the determined type of account units to the first subscriber service.

37. (Currently Amended) A telecommunications subscriber service package, comprising:
a non-transitory computer-readable storage medium to:

- store an allocation of unshared account units for use of a first subscriber service;
- store an allocation of shared account units for use of a second subscriber service and available for use of the first subscriber service;
- store instructions that, when executed by a processor, cause the processor to determine a number of shared account units remaining; ~~and~~
- store instructions that, when executed by the processor, cause the processor to determine a type of account units to be utilized by the first subscriber service based on the number of shared account units remaining, wherein the allocation of the unshared account units is utilized by the first subscriber service after exhaustion of the allocation of shared account units; and
- store instructions that, when executed by the processor, cause the processor to allocate the determined type of account units to the first subscriber service.

38. (Currently Amended) A telecommunications subscriber service package, comprising:
a non-transitory computer-readable storage medium to:

- store an allocation of unshared account units for use of a first subscriber service;
- store an allocation of shared account units for use of a second subscriber service and available for use of the first subscriber service;
- store instructions that, when executed by a processor, cause the processor to determine a type of account units to be utilized by one of the first subscriber service and the second subscriber service, wherein relative usage of the allocation of the shared account units by the one of the first subscriber service and the second subscriber service is limited according to a predefined usage ratio; and
- store instructions that, when executed by the processor, cause the processor to allocate the determined type of account units to the one of the first subscriber service and the second subscriber service.

39. (Previously Presented) The telecommunications subscriber service package of claim 36, wherein the allocation of shared account units includes shared telecommunication minutes.

40. (Previously Presented) The telecommunications subscriber service package of claim 36, wherein the first subscriber service is a land-line telecommunications service and the second subscriber service is a mobile telecommunications service.

41. (Previously Presented) The telecommunications subscriber service package of claim 40, wherein the land-line telecommunications service comprises a long distance telephony service.

42. (Previously Presented) The telecommunications subscriber service package of claim 40, wherein the land-line telecommunications service comprises a local telephony service.

43. (Previously Presented) The telecommunications subscriber service package of claim 36, wherein the first subscriber service is associated with a first operating entity and the second subscriber service is associated with a second operating entity.

44. (Previously Presented) The telecommunications subscriber service package of claim 36, wherein the allocation of shared account units is available for a period of time.

45. (Previously Presented) The telecommunications subscriber service package of claim 44, wherein the period of time is one month.

46. (Previously Presented) The telecommunications subscriber service package of claim 37, wherein the allocation of shared account units includes shared telecommunication minutes.

47. (Previously Presented) The telecommunications subscriber service package of claim 37, wherein the first subscriber service is a land-line telecommunications service and the second subscriber service is a mobile telecommunications service.

48. (Previously Presented) The telecommunications subscriber service package of claim 47, wherein the land-line telecommunications service comprises a long distance telephony service.

49. (Previously Presented) The telecommunications subscriber service package of claim 47, wherein the land-line telecommunications service comprises a local telephony service.

50. (Previously Presented) The telecommunications subscriber service package of claim 37, wherein the first subscriber service is associated with a first operating entity and the second subscriber service is associated with a second operating entity.

51. (Previously Presented) The telecommunications subscriber service package of claim 37, wherein the allocation of shared account units is available for a period of time.

52. (Previously Presented) The telecommunications subscriber service package of claim 51, wherein the period of time is one month.

53. (Previously Presented) The telecommunications subscriber service package of claim 38, wherein the allocation of shared account units includes shared telecommunication minutes.

54. (Previously Presented) The telecommunications subscriber service package of claim 38, wherein the first subscriber service is a land-line telecommunications service and the second subscriber service is a mobile telecommunications service.

55. (Previously Presented) The telecommunications subscriber service package of claim 54, wherein the land-line telecommunications service comprises a long distance telephony service.

56. (Previously Presented) The telecommunications subscriber service package of claim 54, wherein the land-line telecommunications service comprises a local telephony service.

57. (Previously Presented) The telecommunications subscriber service package of claim 38, wherein the first subscriber service is associated with a first operating entity and the second subscriber service is associated with a second operating entity.

58. (Previously Presented) The telecommunications subscriber service package of claim 38, wherein the allocation of shared account units is available for a period of time.

59. (Previously Presented) The telecommunications subscriber service package of claim 58, wherein the period of time is one month.
